Objectives.

I study **programming** because we live in an ever-evolving digital world. I'd love more than anything to help increase the planet's sustainability through developing technological means. I'm also a huge fan of intellectual property and its implications for the future in law. These are the specific areas of computers where I'd like to focus my studies and work. I'm **hardworking, goal-oriented, and dedicated** to changing the world. I'm also planning on going to law school if everything goes as planned.

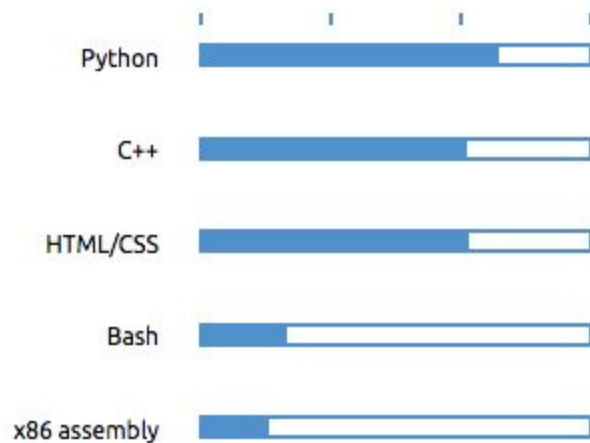

Education & Skills:

University of Colorado

Class of 2017

Ocean City High School

Class of 2013

- Intro to Computer Science
- Computer Systems
- Algorithms
- Data Structures
- Discrete Structures
- Software Tools & Development

I am experienced in social media, internet marketing, and search engine optimization.

I am familiar with the languages C++, Python, HTML5/CSS, MySQL, and x64 assembly.

I am interested in blockchains, autonomous vehicles, and space exploration.
